

How to Migrate to Planky from Credit Kudos?

If you were a Credit Kudos open banking customer, you might be asking yourself two questions:

- Who's going to provide my open banking needs in the future?
- How can we migrate to an alternative open banking provider without losing our Credit Kudos data?

The good news is that **Planky** can answer both of these questions for you.

Planky is your number one alternative to Credit Kudos. A leading open banking provider, we offer all the open banking services you would have been enjoying with Credit Kudos, and more.

But the icing on the cake is that we've made migrating to Planky from Credit Kudos quick and easy. In just a few simple steps, which we will do for you, we can pull all your existing data into your Planky dashboard so that you can continue to monitor your customers.

Our intuitive '**bring your own data**' solution makes it easy to push your existing banking data to us in a matter of seconds.

Alternatively, our recommended route is allowing Planky to send new invitations to your customers. Not only does this mean we can pull all your customer banking data into our system, **including all existing Credit Kudos data**, it enables us to pull new banking data into your dashboard in the future, too. Once all your data is in your Planky open banking dashboard, we can erase the Credit Kudos data to avoid any confusion or overlap.

Choose Planky as our new open banking provider and **migrate your existing** Credit Kudos data today.

Start with your free Account now. Planky offers **14-day free trial** with no commitment!
